

PROFILE

Always looking for a challenge. That idea, in part, has been why I have sought out various subspecialties in the histology field. I love to continually learn new techniques, and have been fortunate enough to be part of a hospital network that has allowed me to do just that. I have been passionate about the work I do, know that it help patients every day.

Recently I have become passionate about learning in a new field. By chance I heard a new segment a few months back about women in coding. This sparked an interest which then in turn lead me to enrolling in a web development course.

After completing the course, I plan to pursue a job in this field.
